**QuickBooks is easy to use and easy to navigate. I have been using it for years and find it is perfect for small to medium size businesses. It has many capabilities I haven't even used yet but from using it for many years, I have seen a big improvement in what the program is capable of.**

The business I work with now works in multiple currencies. QuickBooks handles this really well. I also find the tracking of capital assets very helpful! As the accountant for a small and quickly expanding business, I find that QuickBooks is able to grow as we do.
